AMENDMENT AND REPLY UNDER 37 C.F.R. § 1.111

Commissioner for Patents  
Washington, D.C. 20231

Sir:

In reply to the Office Action mailed March 31, 2003, please amend the application as follows and consider the following remarks.

**In the Specification:**

Please substitute the following rewritten paragraph for the paragraph located on page 19, lines 1-19 of the specification.

Accordingly, for example, as shown in Fig. 5, when the light of the light source 2 is reflected at one point  $P_1$  on the reflection surface 4 in the third reflection surface block 23 from the left which is closest to the light source 2, the outgoing light  $L_5$  output from a rear end b of the light source (filament) 2 is emitted to a lower side at an angle  $\theta_1$  with respect to a horizontal line  $S_1$ , as shown in Fig. 1. On the contrary, the outgoing light  $L_4$  output from a front end a of the light source (filament) 2 is emitted to a lower side at an angle  $\theta_2$  with respect to the horizontal line  $S_1$ . The emitted lights  $L_4$  and  $L_5$  are formed in a longitudinal shape in a vertical direction substantially in a center section on the screen, as shown in Figs. 8A and 12. Further, they are slightly inclined from the light source 2 at a difference in the lateral direction. The angles  $\theta_1$  and  $\theta_2$  of the outgoing lights  $L_4$  and  $L_5$
